

PROBLEM SET 3

ECON301—ECONOMETRICS I

ALEJANDRO MELO PONCE

NAZARBAYEV UNIVERSITY

Instructions: Due on 6/3/2020 before 12 PM by email to alejandro.melo@nu.edu.kz and with CC to aisulu.nurkey@nu.edu.kz. Your submission should consist of a proper R script, which I should be able to run. You can work in groups of up to 4 students. If you worked with a group, please indicate the names and IDs of each member in your submission.

1. The purpose of this problem set is to force you to start working in R, since you will need it for your final project. Furthermore, now it is a good time to start doing some estimations on your own using the simple linear regression model before we move on to multiple regression. **Please do problems C2, C4, and C6 from the computer exercise of Chapter 2.** Your R script should contain all the code necessary to answer all the questions. Be sure to comment it so I can see that you understand what you are doing. If the question asks for it, report your answers as comments in the R script.
