

Tyhalt does not know that Juliet does not know that Tyhalt read the Letter

$(K_T B^c)^c = \text{set of states in which the above is true.}$

$A = \text{Tyhalt read the letter}$

$B = K_J A$

$$A = \{111, 110, 101, 100\}$$

$$K_J A = \{111, 110\} = B$$

$$B^c = \{101, 100, 01, 00\}$$

$$K_T B^c = \{00, 01\}$$

$$(K_T B^c)^c = \{111, 110, 101, 100\}$$

$$\Omega = \{111, 110, 101, 100, 01, 00\}$$

$$\mathcal{P}_T = \{\{00\}, \{01\}, \{111, 101\}, \{110, 100\}\}$$

$$\mathcal{P}_J = \{\{00, 100\}, \{01, 101\}, \{111\}, \{110\}\}$$

In these states, the statement is true
the true state of the world is
